

BIOPRO[®] First MPJ

50 Years of Clinical Success

Townley CO. Taranow WS. A metallic hemiarthroplasty resurfacing prosthesis for the hallux metatarsophalangeal joint. *Foot Ankle* 15(11) : 575-580 1994

- Simple reproducible hemiarthroplasty
- Allows for minimal bone resection
- Low profile diamond-shaped stem provides intramedullary fixation
- Contoured articulating surface simulates proximal phalanx articulation
- Relieves pain and restores biomechanics
- Available for Lesser digits

35 year post-op X-ray
